Faris Hittiny

832-330-0036 | faris@farishittiny.com | farishittiny.com | github.com/FarisHittiny | linkedin.com/in/farishittiny

Education

Texas A&M University — College Station, TX
Bachelor of Science in Computer Engineering, GPA: 3.64 — *Expected May 2027*

Technical Skills

Machine Learning & AI: PyTorch, YOLOv8, Detectron2, OpenCV, Azure OpenAI, scikit-learn
Programming & Systems: Python, C#, .NET, C++, C, JavaScript, SQL, Bash, MATLAB, Git, Linux, Docker, CI/CD
Web & Databases: Node.js, Express, REST APIs, PostgreSQL, SQL Server, Entity Framework Core, Open XML SDK
Cloud & Enterprise Tools: AWS, Microsoft Copilot Studio, Salesforce Agentforce, Microsoft 365 Copilot, SSMS, Visual Studio, VS Code
Embedded & Acceleration: Verilog, FPGA Prototyping, LiteX, Renode, Verilator, Zephyr RTOS

Experience

Aramco Americas — Houston, TX
AI/ML Engineering Intern, Digital & Information Technology — *May 2026 – Present*

- Built AI-powered invoice extraction and document understanding solutions on **Azure OpenAI**, creating anonymized datasets and validation pipelines to evaluate model output at scale.
- Designed an AI Interview Scheduling Agent in **Microsoft Copilot Studio**, integrating Azure OpenAI with **SAP SuccessFactors** to automate candidate scheduling end to end.
- Built AI agents on **Salesforce Agentforce**, designing agent actions grounded in org data and testing failure modes against production reliability requirements.
- Automated invoice processing for AT&T, Verizon, and T-Mobile carrier billing data, replacing manual reconciliation steps in the Cellbill Manager platform.
- Developed and enhanced enterprise billing applications using **C#, .NET, Entity Framework Core, SQL Server**, and Open XML SDK.
- Debugged database, API, networking, and proxy-authentication failures across enterprise environments; documented fixes and handoff procedures for the development team.
- Awarded the **Excellence in Teamwork Award** through Aramco's Next Gen Leaders program (2026).

Texas A&M University — College Station, TX
AI/ML Undergraduate Research Assistant, Disease Management in Animal Systems — *May 2025 – May 2026*

- Developed and benchmarked **10+** deep learning models (YOLOv8, Mask R-CNN, Detectron2) for eartag detection in continuous field video.
- Processed and labeled **10,000+** images from 4+ months of continuous video, creating scalable datasets for model training and validation.
- Automated preprocessing pipelines that cut manual work by **60%+** across an 11-member team, using Git and HPC scheduling (Slurm) for reproducibility.

Projects

Boba Shop Point-of-Sale System | *Node.js, Express, PostgreSQL, OAuth* – CSCE 331 — Fall 2025

- Built a full-stack point-of-sale and inventory system supporting cashier, manager, and customer-facing views.
- Designed a normalized PostgreSQL schema and REST API driving live order entry, inventory depletion, and sales reporting.
- Added Google OAuth login, translation, and weather API integrations for accessibility; delivered across Agile sprints in a 5-member team.

AI-Driven Demand Mapping | *Python, AWS* – Tidal Hackathon (Top 10 of 200+ teams) — Fall 2024

- Built a Python/AWS ML pipeline analyzing **50,000+** sales records to recommend warehouse locations for Amazon sellers.
- Visualized geospatial and sales-trend data, improving estimated delivery efficiency by **20%**.

RISC-V Accelerator on Zephyr | *Verilog, LiteX, Zephyr RTOS* – github.com/FarisHittiny

- Designed a custom popcount accelerator in Verilog with an AXI-Lite interface, integrated into a LiteX/VexRiscv SoC and driven by a Zephyr RTOS MMIO driver.
- Benchmarked cycle-accurately under Verilator CI: **15.1×** fewer cycles than the software baseline on 4KB workloads, with results reproducible from the public repo.

Leadership & Involvement

Arab Student Association (ASA), Texas A&M University — College Station, TX
Membership Chair — *2026 – Present*

- Lead membership recruitment, onboarding, and retention for one of the largest cultural organizations on campus.
- Coordinate meetings and cultural events with the officer board, supporting member recruitment and retention growth.
